| Course Duration   | 2 days (16 hours / 9am to 6pm)   |
| Course Fees   | S\$1000  |
| <b>COURSE OUTLINE</b>   |  |
| <b>Course Overview &amp; Objectives</b>                               | <p><b>This course covers Reporting with Global Reporting Initiative (GRI) Standards 2021 &amp; a value-added session on Task Force on Climate-related Financial Disclosures (TCFD).</b></p> <p>Sustainability reports convey an organization's environment and social performance of companies alongside traditional financial results. Companies seeking to enhance their sustainability performance and in-house capacity need to equip themselves with the requisite knowledge on sustainability reporting standards. This course is designed to support companies and individuals in developing internal expertise with minimal involvement of external support and produce reports that are assurance worthy.</p> <p>The Global Reporting Initiative (GRI) is an international independent standards organization that helps businesses, governments, and other organizations understand and communicate their impacts on material issues such as climate change, human rights and corruption. More than 80% of world's leading reporters use GRI Standards as the framework for developing their sustainability reports owing its modular and interrelated structure, and step-by-step guidance on communicating sustainability performance.</p> <p>This course outlines and introduces participants to the concepts of GRIs reporting principles (content &amp; quality), engaging with stakeholders, material topics identification, prioritization and target setting. Further guidance is provided on identifying material topics. Management approach, data collection/compilation and presentation are covered to enhance participants knowledge on GRI Standards.</p> |
| <b>Course Contents</b>  | <p>The course covers the following:</p> <ul style="list-style-type: none"> <li>- Enhance knowledge of participants on GRI standards, evaluating sustainability reports</li> <li>- Benchmark internal reporting with peers and gear for better reporting</li> <li>- Identifying, engaging with stakeholders</li> <li>- Material matters identification, prioritization and target setting</li> <li>- Collect, compile sustainability data and present sustainability reports</li> <li>- Overview of Sustainable Development Goals and their interlinkages with sustainability performance of organizations</li> </ul>   |

|                                    |   |
|------------------------------------|---|
|                                    | <p>- Discuss the Task Force on Climate-related Financial Disclosures (TCFD) - a framework developed by the TCFD to help companies and organizations more effectively disclose climate-related risks and opportunities through their existing reporting processes, in order to increase and improve the reporting of climate-related disclosures.</p>  |
| <p><b>Learning Outcomes</b></p>    | <p>Expected learning outcomes include perspectives on concepts of sustainability reporting and enhanced exposure on how to develop sustainability reports.</p> <p>Post completion of the course, participants will receive a certificate directly from the Global Reporting Initiative (GRI). 20% discount on the GRI Standards Exam fee, by GRI for those candidates who successfully complete the course.</p> |
| <p><b>Learning Methodology</b></p> | <p>The workshop is delivered in an interactive learning setting with mini lectures, case studies and interactive workout sessions to enable participants get a grip on the standards and report development process. A session by GRI secretariat would be part of the training to answer any specific queries of participants and support available from GRI.</p>  |
